

FIG. 1 is a perspective view of a power conditioner assembly.

FIG 1

FIG. 7 is a top view of the device of FIG. 1, showing the arrangement of the components on the top surface of the device. The device is a rectangular unit with a central horizontal slot. The top surface is divided into four main sections by three vertical dividers. Each section contains a series of circular components, likely LEDs or sensors, arranged in a grid pattern. The central section also features a series of small, rectangular components along its length. The bottom surface of the device is shown in FIG. 8, which is a top view of the device of FIG. 1, showing the arrangement of the components on the bottom surface. The device is a rectangular unit with a central horizontal slot. The bottom surface is divided into four main sections by three vertical dividers. Each section contains a series of circular components, likely LEDs or sensors, arranged in a grid pattern. The central section also features a series of small, rectangular components along its length.

FIG 10

FIG. 11 is a perspective view of the front panel of the device, showing the arrangement of the display units, the control buttons, and the indicator lights.
